Mustafa Sabbagh

Chairman of the Board

As the Syrian crisis continues, the tragedy of millions of displaced Syrians and refugees seeking a safe shelter increases, and with this horrific catastrophe, our core mission at Syrian Forum is to support the Syrians in their aspiration to have a free and dignified life.

Since its establishment, Syrian Forum has been, and still faces continuous challenges, with more determination to invest in all opportunities and make the utmost efforts to support the Syrian individuals and develop the Syrian community with all its components, through economic empowerment, training and employment programs, education projects, strategic studies, and other programs to compliment our vision of an empowered Syrian.

Throughout the past years, we have strategically widened our partnerships to include regional and international organizations, we have overcome numerous challenges and celebrated new successes but were always focused to serve Syrians intellectually, physically and holistically. We strive to build their capacities and help them build strong and prosperous society

Our mission is not over yet, in 2020, we plan to continue building their capacities through quality programs in economic empowerment and self-sustenance to help them build strong and prosperous community, where everyone is equal in front of law.

How We Work

Needs Based

Our approach to programs is one that is built on listening to the local communities and identifying their needs through various assessment tools including key informant interviews, focus group discussions and sample surveys.

Strong Program Design

The next step is ensuring a strong program design whereby the Programs Departments takes the identified gaps and creates a program that aims to address the root causes of these needs. Key community leaders and local councils are often consulted at this stage in order to better understand the feasibility of such programming.

Quality Implementation

We placed a concerted effort in building the capacity of all staff, including those on the front line. The experience of the staff has contributed to their ability to implement programs with high quality, ensuring the integration of key stakeholders and in line with humanitarian principles.

Policies and Standard Operating Procedures

The program operates within policies developed based on the requirements of each sector. Each of these policies follows the standard operating procedures, which explain the mechanism of work within the departments in detail, in addition to the roles and responsibilities of those within the department.

Monitoring, Evaluation, Accountability and Learning

Through this function, we are able to monitor the outputs of programs and measure their impact throughout baseline and endless assessments. It also provides access to beneficiaries to give their feedback and complaints. Our MEAL department allows us to learn lessons from previous projects and apply them moving forward in order to strengthen our future programming.

- Early Economic Recovery in Syria: Challenges and Priorities
- The Political Economy of Early Recovery in Syria
- Early Recovery in Syria: An Assessment of the Regime's Role and Capacities
- The Turkish Approach to Early Economic Recovery in Syria: Euphrates Shield Area as a Case Study

Palestinians of Syria.. Violation of Rights and Identity Challenges (Ar & En)

This book highlights legal status and other problems facing the Palestinians of Syria, the continued depletion of their presence in Syria, and the difficulties that face those who were forced to migrate and flee towards other countries. All attempts to remedy the deep fractures that have affected them remain tied to the outcomes of the Syrian crises. It is difficult to foresee approaches or solutions that will assure Palestinians about the future of their existence in Syria, or lead them to a more secure legal status that guarantee their rights, so long as the international community

is unable to end the tragic conditions of war, which portend even more tragic choices for the future of Syrians and Palestinians alike. Not least among those trajectories are the shrinking opportunities that refugees face with regards to regaining their original and fundamental right to return to the homeland from which they were originally displaced. This is especially true since the Syrian crises with all its tragedies, has moved them further away from Palestine and the refugee camps near it.
